

ABS SENSOR PROTECTION

20,70€

41981-002. Wunderlich ABS sensor protection

The ABS sensor is a sensitive component and is pretty exposed on the front wheel. A stone or branch thrown up can quickly damage or even completely destroy the sensor, which can result in extremely costly repairs. This ABS sensor cover closes the gap between the brake calliper and the front wheel bearings and prevents damage or the ABS sensor being ripped off. Small investment - big usefulness!

The facts:

nodised aluminium

Simple assembly

Perfect fit and form-fitting

Reliable protection and secure hold

Available in a choice of silver or black

Supplied complete with all attachment hardware

SKU: 41981-002
