TURN SIGNAL CANCEL SWITCH LEVER

31,20€

40930-000. Perhaps you have experienced the rather clumsy operation of the turn signal cancel switch. The newer switch gear does offer some improvements over previous versions but the position and function of the cancel button seems to have taken a step backwards. Therefore, we created this turn signal cancel lever and it offers vastly improved function and ergonomics. The part simply attaches to the right side mirror perch and now instead of contorting and trying to find the small cancel switch, you simply press on the easy to find lever and presto, riding enjoyment is once again improved by Wunderlich. The facts: Easier to cancel the turn signals 1.5mm thick, high quality spring steel Powder coated black Easy to install Made in Germany Note: Please click on the Applications Tab to make sure this part fits your bike!
