

AIR INTAKE GRILL, PAIR, R 1200 GS LC (2013 -) T

104,10€

R 1200 GS LC (2013 -) t

Optically, the air intake of the GS LC is an ugly hole in the fairing. Furthermore, it is also quite counterproductive.

Any foreign object in the intake air, whether leaf, dirt crumbs or big insects fall directly and freely in the air filter.

If the motorcycle is accordingly used, this fact will inevitably lead to a loss of power.

Our air intake grille has a nice design, it closes the fairing opening visually appealing and protects reliably against foreign objects.

The mounting is quite easy and done within a minute. A small part with a huge effect, optically and practically.

Set (left and right).
