

ALTERNATOR BRUSHES WITH RING CONNECTORS

10,32€

38510-100. Those quick-wearing carbon brushes inside the Bosch alternators are soldered in place as Standard so replacing them is not as easy. We offer this brusher with a – as we consider it – clever ring connector which make replacing a cinch. There is no more soldering need, simply stick ring connector under each cable connection, and that's it!
