

BASE PLATE FOR TANK BAG ELEPHANT

83,30€

20630-000. This new tank bag features a solid base which is first attached to the tank. The tank bag is quickly and easily attached to the base plate by means of a tongue that slides into the base plate. Removal is just as simple and for those bikes where the "tank" is really a tank, we have designed an easy access flap to the filler, so that the base can remain in place.
