

BELLY PAN R NINET RACER (2017-)

676,30€

45052-800. The Belly pan in carbon for the BMW R nineT Serie is a direct replacement for the original component.

it contributes mainly to weight saving on the motorcycle (up to 70% less) and a higher stiffness of the parts. Like all of our carbon fibre parts, it was made according to the latest protocols and industry standards and can be considered to encompass all aspects of current 'best of industry' practice. The part is made completely out of pre-preg carbon fibre materials using an autoclave.

As with all our carbon parts, we use a clear plastic coating that not only improves the appearance, but also protects the carbon fibre from scratching and has a unique UV resistance.

Note: Any decals on the carbon part are only a design option of the manufacturer, we deliver the carbon part without stickers on it.
