Many people find that the gear shift lever tip is too short and too thin. This enlargement is simply pushed over the original lever tip and is firmly held in place. The length, the girth and the improved grip make changing gears a pleasure. The lever is also given a sporty look. Turned, machined and anodised from solid aluminium.

You' ll learn to appreciate this innovation once you' ve tried it out.

The facts:

High-quality workmanship using solid aluminium.

Durable anodised coating.

Quick and easy fitting.

SKU: 26250-001
