In its original form, even on the new GS, the footrest area is unfortunately rather small, which all too often presents a safety risk.

The extension means that it is almost impossible for the foot to slip off or to miss the lever altogether.

With this, the GS is also enriched by the addition of another highlight. You' ll learn to appreciate this innovation once you' ve tried it out.

Elaborately machined and anodised at no great expense. Safe and easy installation: The top plate is bolted securely with two bolts (all supplied) to the counter part, which has threads cut in an angle to ensure exact fitting.
