The logical complement to the engine protection system.

The engine protection effect theme continues with the centre stand. The centre stand, catalytic converter header pipe and swing arm mounting are all protected from serious damage. And, in addition, should it bottom out, the bike can glide along the ground on a fully protected undercarriage until the rear wheel finds purchase again.

The facts:

4 mm (0.15") strong aluminium.

Integrated swages bring high stability.

Secure, easily fitted restraint systems.

Maximum protection for main centre stand, header pipe and swing arm.

Made in Germany.
