

CLADDING SUPPORT OIL COOLER R NINET RACER 2017

104,10€

45052-100. The cladding support on the oil cooler for the R nineT Racer from 2017 fits perfectly in the design of the motorcycle.

Most prominent are the weight savings (as a rule, a saving of approx. 70% compared to the original component) and increased rigidity. The carbon part is made completely of pre-preg material in accordance with the newest guidelines in autoclaves and in the next step - as usual for us - it's covered with a clear plastic cover to protect against impacts on the environment.

This plastic covering exceeds the customary clear lacquer covering in the protective effect, scratch resistance, and durability to a large degree. But the covering does not only score technically, it also clearly underscores the three-dimensional effect of the carbon structure.

Note: Any decals on the carbon part are only a design option of the manufacturer, we deliver the carbon part without stickers on it.
