F 800 R (2012 - 2014)

Adjustable Sport-Touring screen

This screen gives the F 800 R a new appearance and improved wind protection. Now you will have the choice between a sport screen and a touring screen, changeable with minimal effort. The Sport screen attaches on top of the original painted “fly screen” or the original BMW clear “Sport” screen.

This is an aerodynamic masterpiece that fits well with the overall design and appearance of the F 800 R. The overall adjustment range is 60mm (2-3/8”) and in the lowest setting the top of the screen is already 10cm (~ 4”) taller than the clear BMW Sport screen and in the high position, 16cm (6-1/4”) so that a suitable position can be selected for most riders and conditions. The fact that this screen lays over the top of the original creates a channel through which the oncoming air can flow. This is a benefit in managing the airflow with minimal turbulence and buffeting.

Made of 5mm thick Polycarbonate material. A lightweight, powder coated support bracket is included.

Available in clear, tinted or opaque black.

SKU: 20290-002
