R 850 GS

The new generation of ERGO Seats: Well-thoughtthrough at every step of the design, with many innovative

solutions. The original seat suffers from an unfavourable form which places undue strain on the tailbone, and

the angle of the seat leads many riders to adopt a bad pelvic position.

To counter this we use a foam core with completely new contours and a unique fabric, developed with great care with no expense spared.

The facts:

Regular = original standard seat height.

Distinctly shaped (concaved) seating area.

Relief of pressure on the tail bone and optimised weight distribution across the whole seat.

Improved pillion contours for improved forward hold.

Progressive double-layer construction with soft upper layer and rigid core for even distribution of forces.

Uncompromising durability for long distance use.

Non-slip, anti-perspiration material combined with Alcantara suede seams.

Strong RoburC seat pan of our own construction.

Classy recessed cut seams.

Seams glued and heat-sealed on modern PFAFF hot-air welding machines for 100% impermeability.

Design by Nicolas Petit (Paris).

Made in Germany.

The passenger seat can be found under the part number: 8360058
