

ERGO FAIRING EXTENSION – CLEAR R 1200 RT (2010 – 2013)

168,00€

R 1200 RT (2010 – 2013)

A perfectly engineered widening of the fairing to permanently improve touring comfort and effectively protect the legs and feet from wind, rain and cold. Cold air streams and ascending turbulence from below the fairing (one of the RT's main drawbacks) are effectively checked.

Our test rides have shown that this is the optimum width for the RT. The contours exactly follow those of the fairing - with this add-on we have created a crystal-clear enhancement of the new RT's design. The clear formal language lends support to the RT's pretension to being one of the best tourers there is, combining as it does an outstandingly agile chassis with the protection expected from a super tourer.

In this way even longer tours will be a pleasure. Made of 6.5 mm-thick highly durable fracture and scratchresistant acrylic.

TÜV certified with all fitting parts. Easy to fit. Can be used with or without protection bars.
