

ERGO FOOTREST LOWERING

167,00€

31430-401. Short distances could become a torture for many riders: an extremely acute knee angle leads to blood congestion and pain in the hollow of the knee. But our footrest lowering solves this problem; it provides a comfortable and ergonomic seating position.

The facts:

Lowering 20 mm).

Significantly more relaxed seating position.

Reduced, circulation-enhancing knee angle.

Elimination of painful cramps.

Considerably higher long-distance comfort.

Exactly to the footrest brackets contour customized installation with minimized shift for optimal lean angle.

Three-dimensionally milled from the solid, for optimal positioning of the original footrests.

Complete kit, ready for installation. No modifications to the vehicle necessary and no function is impaired (side case assembly, etc.)

Easy fitting.

Inclusive ABE approval (registration is not necessary).

5 year warranty.

Made in Germany.
