R nineT (2014 -)

For many riders short distances could be a torture: an extremely acute knee angle leads to blood congestion and pain in the popliteal fossa. But our footrest lowering solves this problem; it provides a comfortable and ergonomic seating position.

The facts:

Height adjustable installation with large adjustment range of 30 mm (corresponding to a variable lowering of up to 50 mm).

Significantly more relaxed seating position.

Reduced, circulation-enhancing knee angle.

Elimination of painful cramps.

Considerably higher long-distance comfort.

Exactly to the footrest brackets contour customized installation with minimized shift for optimal cornering clearance.

Three-dimensionally milled from the solid, for optimal positioning of the original footrests.

Complete kit, ready for installation. No modifications to the vehicle necessary and no function is impaired (side case assembly, etc.)

Suitable for all original case systems.

Easy fitting.

Anodized, CNC milled Aluminum.

inclusive ABE approval (registration is not necessary).

5 year warranty.

Made in Germany.
