R 1200 R (2011 – 2014)

The new generation of ERGO seats: Well-thoughtthrough at every step of the design, with many innovative solutions. The original seat suffers from an unfavourable form which places undue strain on the tailbone, and the angle of the seat leads many riders to adopt a bad pelvic position. To counter this we use a foam core with completely new contours and a unique fabric, developed with great care and at no little expense.

The facts:

Distinctly shaped (concaved) seating area.

Relief of pressure on the tail bone and optimised weight distribution across the whole seat.

Improved pillion contour for improved hold to the front.

Progressive double-layer construction with soft upper layer and rigid core for even distribution of forces.

Uncompromising durability for long distance use.

Non-slip, anti-perspiration material combined with ultrasuede cording.

Strong RoburC shell of our own design.

Classy recessed CUT seams.

Seams glued and heat-sealed on modern PFAFF hot-air welding machines for 100% impermeability

Design by Nicolas Petit
