

EXHUAUST PIPE END CAP R NINET RACER 2017

208,30€

45052-700. The exhaust pipe end cap for the BMW R nineT series replaces the original component using the original attachment points.

Most prominent are the weight savings (as a rule, a saving of approx. 70% compared to the original component) and increased rigidity. The carbon part is made completely of pre-preg material (see FAQ) in accordance with the newest guidelines in autoclaves and in the next step - as usual for us - it's covered with a plastic cover to protect against impacts on the environment.

This plastic covering exceeds the customary clear lacquer covering in the protective effect, scratch resistance, and durability to a large degree. But the covering does not only score technically, it also clearly underscores the three-dimensional effect of the carbon structure.

Note: Any decals on the carbon part are only a design option of the manufacturer, we deliver the carbon part without stickers on it.
