R 1250 GS	Does not fit with original engine protection "Enduro"
R 1250 GS Adventure	Does not fit with original engine protection "Enduro"

The original mudguard is simply too short! The result is dirty headers and engine cases, clogged up oil coolers, stone damage to the radiator and unnecessary water splashing are irritating.

This **extension** of the original mudguard, thermoformed from ABS material, puts an end to the problem.

Supplied complete with fastening screws and self-adhesive foam strips for a vibration-free and secure fit.

Black ABS plastic. For the original mudguards.

This part is not compatible with the original large engine protector (BMW accessory part), no fitting issues with the standard engine protection.
