

FORK COVERS FOR 36 MM BLACK

42,00€

44420-602. Fork cover, for use on original lower fork yoke. In general, on most of the BMW specials covers and headlight mounts are taken off. But with this original lower fork yoke reveals a nasty looking step. In order not to start with machining or rubbing it down by hand we produce a nice little ring as a cover which is fixed by a tiny grub screw. Cover is available in two versions – one for 36 mm fork tube diameter and another one for the 38,5 mm version. Offered anodized colours are silver and black.
