A combination of riser and also a handlebar displacement towards the rider. The result is a significantly more relaxed touring sitting position and a true “touring” feeling.

The facts:

- Height increase of about 38 mm and offset of about 27 mm closer to the rider
 - Better handling
 - More direct riding feel
 - Relaxed, upright sitting position
 - Protection of entire musculoskeletal system
- Now possible to ride standing up when off-road = More fatigue-free riding and better control

Technical data
