

HANDLEBAR RISER FOR MODELS WITHOUT BMW NAVIGATION SYSTEM

124,90€

31000-111. A barely visible modification that has a massive impact:

25 mm height increase.

Better handling.

More direct riding feel.

Relaxed, upright sitting position.

More fatigue-free riding and better control.

Anodised in silver.

Individually milled from high-strength Dural aluminium.

Made in Germany.

Complete with screw set.

With ABE.

5 year warranty. A huge boost in riding comfort in every respect and improved handling feeling. The R LC and RS LC feels even lighter and more agile. Thanks to the improved handlebar tilting options, the seat position can be further improved.

Note: If you want to retain the original sat nav holder, you will also need item 31000-200.

The clutch hose must be free of tension and bled before the handlebar riser is installed. For this reason, installation must be carried out by specialist personnel or a specialist workshop!
