

INSTRUMENT SURROUND WITH VISOR – SILVER R1200RT (-2009)

72,80€

R 1200 RT (- 2009)

The original instrument configuration is rather plain, the gauges can be difficult to read in direct sunlight and the housing/glass can become faded.

These instrument surrounds effectively refine the entire cockpit and reduce glare on the instruments and also prevent environmental damage to the housing and glass.

Easy to install. Complete assemblies for the entire instrument housing.
