

KELLERMAN BULLET 1000 (PIECE) BLACK FRONT

131,70€

36340-202. Classic meets high-tech

One "highlight" of the product comes in the form of the newly developed light technology (Kellermann HPT), which enables a homogenous, ring-shaped beam and once again makes a mark. After all, design quality doesn't stop with the product design and product surface but is also defined through the light emitted. The high-quality crafted metal casing with a maximum diameter of 39 mm appears discreet as a decoration on your motorcycle and is available in surface variations of chrome, black or matte chrome. The Bullet 1000 thus fits any demanding bike design.
