

LED ADDITIONAL HEAD LIGHT ATON FOR HEPKO & BECKER TANK PROTECTION

415,76€

28340-402. Highly luminous, low energy absorption and more active safety! ATON additional headlights increase the vehicle outline and provide a considerably expanded field of view at night.

Suitable just for Krauser and Hepco & Becker tank protection bars

The facts: 100% uniform illumination thanks to the stretched, three-dimensional diffuser lens.

Pure white daylight temperature.

Very long life (about 100.000 hours = about 4.000 days non stop glow).

Defined limits upward and downward = no dazzle for the oncoming traffic and excellent illumination in fog, rain etc. (no stray light).

No self-glare.

Thanks to the mounting in pairs the illumination area can be adjusted individually for each headlight (height setting).

Very good additional illumination for headlight.

Extremely robust through a closed and sealed construction.

Protected according to the IP67. Only 66 mm diameter (headlight).

Integrated ballast unit = no additional mounting or space required for ballast unit.

E approved as fog light (no registration needed).

Special bracket set for every vehicle type, for a perfect integration and less assembly effort (no vehicle modification needed).

Headlight set (right & left), consisting of two ATON-LED additional headlights, weight optimised bracket set and electrical installation kit.

5 years of guarantee.

Made in Germany.
