

MINI FOOT PUMP

59,80€

41740-000. There could be many reasons why you would have to refill some air – and this might not only be a puncture. For this and many other purposes we are now offering this high-quality and enormously practical mini air pump which is made of massive aluminium. It has an integrated double cylinder with pressure switch which allows a pressure of 12 bars. The facts: The dual pump head with digital quality pressure gauge fits to all valves (car, Presta, Dunlop valve).

Made of massive aluminium. Allows a pressure of 12 bars. Integrated double cylinder with pressure switch. Due to the high volume, all tires can be fast and easily filled. The scope of supply also contains needles for balls and inflatable mattresses. A dust cap with integrated Dunlop adapter. Delivered in a nylon bag. So you can really pump up everything quickly and without electricity.
