

## MITAS ENDURO TRAIL+ 90/90-21 (3.00-21) 54H TL/TT M+S

**129,00€**

- Classified M+S for 60% on-road use and designed for all-round performance and confidence on paved roads and gravel roads.
- Aggressive big block chevron tread pattern gives it excellent grip, straight line and cornering stability even in wet conditions. Selected sizes available also in the DAKAR version (Ultra Heavy-Duty) designed for extended durability.
  - Recommended for all Dual-Purpose Adventure Touring motorcycles.
- "For the rider that needs to go anywhere on any road with the freedom to explore. ENDURO TRAIL+ delivers impressive performance on paved roads and rough gravel roads and doesn't shy away from high-speed motorways or extreme off-road tracks.
- ENDURO TRAIL+, developed, tried and tested with the support of Mitas brand ambassador Chris Birch has the same large block chevron pattern as the well-known E-07+ with a round profile and an average rear lug depth of 11 mm and a front lug depth of 8,5 mm.
- The standard ENDURO TRAIL+ uses a Heavy Duty compound and is designed to give the best all round performance on any road in wet or dry conditions without sacrificing comfort, durability, handling and stability.
- The ENDURO TRAIL+ DAKAR version uses an Ultra Heavy Duty dual compound designed for maximum durability with upto 20% more mileage compared to the standard version and is virtually puncture proof thanks to its reinforced carcass.
- The ENDURO TRAIL+ (T speed index) is the Original equipment on 2023 KTM 890 ADVENTURE R."
