

MOTO MASTER BRAKE DISC REAR

155,70€

23250-000. The latest experience and knowledge of racing influence the development of the Moto-Master brake discs. The brake discs are made of hardened stainless steel and refined Chromolybdän and have a perforated brake surface. Even at extremely high heat dimensional stability ensures that design, low vibration and always consistent braking performance. Moto-Master brake discs are laser cut with precision and CNC-milled, ensuring not only a perfect fit, but also provides for an exceptionally sporty look. With the exact plane-parallel polished surface pulsation in the brake lever is avoided. The computer-aided design ensures the self-cleaning of the brake disc and an optimal temperature distribution and heat dissipation. Moto-Master brake discs are compatible with all brake pad compounds. The facts of Moto-Master brake discs: Stainless, hardened, refined chrome-molybdenum steel. Perforated brake surface. Laser cut and CNC-milled. Perfect Fit. Special design for self-cleaning. Supplied with ABE. Long life. Constant pressure point. No disc distortion under extreme heat.
