

MOTOGADGET M-BLAZE PIN INDICATOR

59,80€

36342-702. The m-Blaze Pin from motogadget sets new benchmarks for add-on indicators with Power LED technology.

Its minuscule dimensions and the reduced design mean it almost disappears when mounted on the vehicle. The Intensiled® technology makes it extremely bright as soon as it lights up and you definitely won't overlook it again.

Additionally, the patented TranzLight® Technology (TLT) provides the best visibility and safety with a large beam angle.

The add-on indicator has ECE approval as a front and rear direction indicator. The aluminium casing is CNC-milled.

The facts:

Absolutely unique, new design and function principle (light control via TranzLight® Technology)

Discreet, inconspicuous appearance thanks to the transparent glass body and very small aluminium socket

Greatest lighting output thanks to the latest high-performance LED technology

Electronic power conditioning via 330kHz clocked, IC controlled constant power source and secure safety electronics

Extremely bright light in beam direction, highly visible light on almost all sides

Delivery

Single add-on indicator m.blaze pin with glass body and M8 thread

M8 nut
