

OIL COOLER SURROUND

384,50€

33770-001. If the oil cooler has to be mounted in such an exposed position, then it's the least we can do to give it some classy packaging. Made of strong carbon-fibre material with a rigid plastic protective coating (serves to emphasise the 3D structure). Easy to fit. ABE approved. Note: The image shows the cooler surround fitted with our separately available oil cooler grill. This combination represents in our opinion the best visual upgrade for the cooler/front area of the bike. Important Note: This part cannot be fitted with our engine protection bars.
