

## OIL FILTER KEY

**52,00€**

24220-104. With this oil filter key made of aluminium, you can change the oil filter like a professional in a clean and manageable way without squeezing the filter.

The special feature: you can use both the Torx TX50 and the 16 combination wrench or the spark plug wrench from the BMW onboard tool kit – perfectly practical!

Additionally, our oil filter key is not only very precisely manufactured, but also very visually appealing in anodised blue – an oil change is a feast for the eyes too!
