

PANNIER PROTECTION FOIL

155,00€

42630-100. An indestructible yet flexible adhesive film originally developed for the aviation industry to protect propellers and rotor blades from stone damage. An indestructible yet flexible adhesive film originally developed for the aviation industry to protect propellers and rotor blades from stone damage. Invisible protective film to protect your paintwork from those annoying scratches and scuffs that reduce the value of your bike. The facts: Reduces the energy of stone impacts to a minimum. Also available for headlight protection. (included in complete set). Completely UV resistant, no discolouration of the transparent films. UV permeable(!) meaning that the protected parts of the paintwork will, as usual, change colour over the years. This outstanding feature of the material means that no differences in colour between protected and unprotected paintwork will emerge should you ever want to remove the film. Almost invisible. Contour-hugging fit, that blends perfectly into the overall form. Extremely adhesive. Yet easy to remove. Quick payback (in terms of maintained value) You can continue to clean your bike as before without any restrictions. With just a little skill, you can easily apply the VentureShield motorcycle set yourself. The set includes cleaning fluid, a rubber applicator and fitting instructions: everything you need to fit the film yourself. The films are available for nearly all parts of your bike that are prone to scratching. If properly fitted we offer a 5 year warranty against discolouration, wrinkling and shrinkage.
