

## REAR HUGGER S1000XR (-2019)

**104,10€**

35861-002. The series-produced rear hugger for the XR is somewhat undersized. Wet asphalt can heavily soil your bike's tail, swing arm, and more. We have skilfully extended this cover and pulled it down slightly to the side. This provides an even more understated but significantly more effective protection for the strut, tail, and other components from street dirt and rain, significantly reducing tricky cleaning tasks.

Made of 4mm coloured plastic.

First-class fit and easy installation
