

REMUS SPORT HEADER PIPES – STAINLESS STEEL R 1200 GS/GSA (2010–2013)

665,00€

R 1200 GS (2010 - 2012)
R 1200 GS Adv. (2010 - 2013)

This exhaust header was developed with Silent Sport technology and provides an optimum power curve and a high weight reduction.

The facts:

- performance improvement over almost the entire speed range and a much higher peak power (the WRA system inclusive Performance Controller leads to a performance improvement of up to 14 hp and 10 Nm)
- enormous weight savings (does not need an interference pipe or silencer)
- deep, rich sound (approximately 5 dB (A) or more)
- optimized pipe run
- with Lambda sensor connection (= usable without any modifications of the vehicle)
- easy mounting
- extremely stable system made of satined V4A
- matched to the original silencer, but it also fits with all other accessory equipments

Since the performance inhibiting catalyst is no longer used, you can also drive with leaded fuel.

Only for sports purposes.
