

SCREENSAVE VARIO G650GS 2011

138,00€

G 650 GS (2011 -)

The facts: The windscreen can be installed exactly as required with this part installed.

Improve wind protection in all conditions for riders of every size.

Vertical adjustment range is 75mm (nearly 3")

15° angle adjustment range.

Compatible with all original BMW screens (including the tall version)

The gap beneath the screen changes proportionally with height adjustment, reducing negative pressures behind the screen and thereby buffeting.

Original position (low or tall shield) remains unchanged is desired.

Adjustment made by large grippy knobs. No tools needed to adjust once installed.

Brackets are made of robust, powder coated stainless steel. The adjustment screws cannot fall out when properly installed. Vibration reducing screen attachment and smooth moving Polyamide pivot bushings.

Easy installation, attaches between original screen mount and wind screen.

Complete with all needed mounting hardware.

Tested and approved by TÜV.

Made in Germany.

SKU: 20270-000
