

SIDE CASE-CRASHBAR K1600GT/GTL BLACK

335,00€

K 1600 GT t

K 1600 GTL t

The saddlebag protection bars are the ideal complement to our engine protection bars, but they can also be installed without them. They optically integrate to the bike and offer outstanding protection for the rear of the heavy K1600. If your bike were to tip over, the protruding saddlebags would surely suffer some damage. These bars effectively protect the saddlebags against such damage. Also when maneuvering in tight spaces, the bars can protect your bike from scratches and other damage.

Each saddlebag protection bar attaches to the bike at three points so that in case of a fall, the impact is spread over all points and the energy is absorbed. Ground clearance and cornering clearance is not compromised. Available chrome plated or powder coated black.

The facts:

Protects the saddlebags from side impacts and damage in a tip over

Fits K1600 GT and GTL

Three attachment points, each bar

Complexly shaped round tubing

Also provides a nice hand hold for the passenger

Additionally serves as a lifting and tie down point

Available in chrome or black

Supplied complete with all needed hardware and instructions

No modifications to the bike required

Made in Germany

SKU: 35520-002
