Life insurance for your BMW: The tiny foot that comes with the original side stand means that your BMW will sink into hot tar and any other surface that is less than 100% solid with alarming ease. This precisely machined extension plate, which can easily be bolted to the existing side stand, eliminates the effects of this design fault once and for all. And we have equipped it with external serrations to enable it to be folded down with the boot heel.

The facts:

Safe support for the machine on all surfaces.
Compensates for the leaning angle of the motorcycle.
With serrations for ease of deployment.
Surface area increased by more than 100%.
Rustproof anodised black.
Cut-out for original foot lined with vibration-absorbing foam rubber.
CNC machined of solid 8 mm (0.31")- thick Dural aluminium.
Easy to fit.

Extension provides extra support and is barely visible when the side stand is folded away. All that shows is the serrated edge - a technically superior eye-catcher
