Additional insurance for the GS: fully loaded or on loose ground, a GS supported on the side stand can easily get bogged down. A precisely machined extension plate that can quickly be bolted to the side stand eliminates this risk.

The facts:

- Safe support for the machine on all surfaces.
- Compensates for the leaning angle of the motorcycle.
- Surface area increased by more than 100%.
- 8 mm (0.31")- thick Dural aluminium.
- Rustproof anodised black.
- Rust protection for the original stand plate.
- Cut-out for original foot lined with vibration-absorbing foam rubber.
- CNC machined.
- Easy to fit.

Not suitable for vehicles with lower suspension!
