

THROTTLE ROCKER

13,40€

25020-000. A throttle extension that takes the fear out of long journeys, ensure maximum riding pleasure and is probably the cleverest alternative to a cruise control. This is not a regulator but an addition that makes dynamic, spontaneous changes in speed possible. The facts: Ergonomically perfect addition to the throttle. Even distribution of force over the palm and ball of the thumb. No more joint pains or cramp. No more slipping with thick gloves. Throttle action is considerably more sensitive. Holds speed perfectly. Easy to set to the desired speed. Simply fold out of way when not in use. Very flexible, injection moulded plastic. With rubber adapter (required for some smooth grips). For all models
