Cases/Topcase

All cases with Exhaust recess (welded).

Volume of the Topcase 41 liters. Note: Due to the recess, the trunk volume is reduced on exhaust side by about 5 liters. This volume can be balanced with the optional tool box.

Only custom-made to the vehicle carrier and case records (recess for exhaust).

The slimmest (overall width) system, with the highest Space available on the market.

Maximum utilization of space (no angled edges).

Totally waterproof.

Made of 2 mm thick, salt water resistant Aluminium alloy.

Handmade and completely TIG welded.

Through Welded corners. Plastic corner protectors are additionally riveted.

Bottom plate (for the stability crucial) made in the sandwich procedure. Total thickness: 4 mm.

Additional guard function (absorb shocks = protection for Machine and the rear).

Four-point mounting on luggage carrier.

The outward-opening trunk-lid can be positioned extremely close to the vehicle. The lid can be open as a tray / table can be used.

Soft close hinges up to 180 ° opening angle. Cover remains in the selected Position. This is only possible with a wall thickness of 2 mm.

Lid and seal design also allows deformation without leaking and without functional limitations.

Very robust (5 mm aluminum) and screw-down hooks in series. 4x for case 4x for Topcase.
inclusive complete keys- / lock-kit.

Panniers , top case and tool box will be supplied with a single key.

Cover with two handy tension locks with 450 kg Tensile strength.

All items such as hinges, lid clamps, Luggage hooks, gaskets, etc. available as a spare part.

Outside and inside extremely resistant plastic coating. So there will not blacken Aluminium
abrasion and Case can therefore be used without the inner
bag.

Silver or black coated.

Excellent stability of the removed cases.

3 years warranty.

Made in Europe.

Cases Carrier

Dual mount carrier at four points.

A unique combination of round tube and laser cut flat profile. Thus, the case fit with virtually no
gap in the carrier.

High-quality steel, galvanized and additionally protected by a extremely resistant plastic coating.

Complete with installation kit. Easy to fit.

Optional Accessories:

Tool Box

Made of 2 mm Aluminium.

Outside and inside extremely resistant plastic coating.

So there will not blacken aluminum abrasion and Case can therefore be used without the inner
bag.

Ergonomic design give the hand access in the box. The shape of the box is chosen so that it won't
touch the swingarm or Kardan when compression
the suspension.

Silver or black coated.
