

TRW LUCAS DISC BRAKE PADS REAR

51,40€

23500-000. LUCAS is the leading name in brake pad technology. LUCAS sintered brake pads provide higher performance compared to organic brake pads: They wear in faster, demonstrate even greater responsiveness in wet conditions, and retain performance better in extreme situations such as emergency stops. And because they are from LUCAS, you can trust that brake disc wear is minimized. The facts: Sintered metal pad material Ceramic under layer reduces heat transfer from pads to calipers. Groves in pad channel water and dirt away. Environmentally friendly: (NO asbestos, cadmium, lead or formaldehyde used in manufacturing process) Durable. Suitable for all types of brake discs (not just LUCAS discs). Special compound for rear brake (reduce blocking of rear wheel) ABE approved. Please Note: Sold as a set for each single rotor. Sold as Set for one brake disk.
