

VALVE COVER & CYLINDER PROTECTORS LEFT + RIGHT

280,30€

35610-002. Life insurance for the extremely damage-prone Boxer valve covers! Now also available the Black-Edition. We have developed an effective protection for the valve-covers and the sensitive cylinder head bolt threads in order to prevent damage under all circumstances. The Facts: Protection from impacts, falls and slides. No more grinding of holes in cover. Protects the cylinder head cover from moving and destroying the cylinder bolt threads (cover attachment to head is floating, without protection it could move at impact). Protection for the front attachment bolt. Optimal force distribution through shaped rubber bumpers between protector and valve cover (3M-bumper). No screws etc. in the front impact area. More than 4 mm (1/8") thick slide pad on each side. 3 major double strength attachment points. Hard anodized aircraft-spec aluminum alloy. Made in Germany. This is a sound investment as the original plastic protector can disintegrate even if the bike tips over harmlessly, or can simply fold away if the bike slides. Complete set with installation kit. *Fits 2010 and later model R 1200 GS, Adventure and 2011 and later R 1200 R. If you have a 2009 or earlier model, please order part number 8161533, which you'll find under the Related Products tab. Not compatible with the 2010 and later R 1200 RT.
