R 850 R (– 08/02) t
R 850 RT

The factory spec RT is delivered with a sporty sitting position that inclines toward the handlebar. Anyone who does not like sitting bent over will find here the ergonomic symbiosis of the perfect touring posture with relaxing long-distance travel sitting position. A hardly visible change with a big impact.

The facts:

25 mm height increase (easily moved towards the rider).
Improved handling.
More immediate feel for the ride.
Relaxed upright sitting position.
More mobility.
Individually machined of solid Dural aluminium.
Anodised silver.
Complete with set of bolts.
ABE approved.

Touring becomes a pleasure, and even far-flung destinations can comfortably be reached. The RT lies low with the handlebar ideally at hand for enjoyable cruising. The more upright posture corresponds more favourably with rider height and the RT's imposing look.
