

WARMME E-VEST HEATED VEST INCL. LITHIUM BATTERY AND CHARGER

257,00€

42790-302. Heat at the touch of a button!

This ingenious heated vest can be worn under all garments and is the ideal, simple source of warmth – and not just for winter drivers, either. Thanks to the quality of the materials and the design, it can even be worn as a “normal” vest.

The built-in battery means the vest provides heat for up to 7 hours even without continuous charging, but it can also be supplied with electricity even while you’re driving using the on-board socket.

The facts:

Adjustable circumference due to two zippers at the side

Weatherproof

Effective wind stopper membrane and pleasant mesh lining

Flexible, very thin and streamlined heating elements with invisible circuits

Heating zones perfectly positioned for an ideal and pleasant temperature

Practical one-button operation and “easy touch” regulation

Even visible when dark thanks to three different colours

Easy to operate with thick gloves

Lightweight technology

Integrated, quick-to-recharge lithium-ion battery in a small inside pocket

Average runtime without charging while driving: HIGH up to 3.5 hours

MED up to 6.5 hours

LOW up to 7 hours

Can naturally also be recharged while driving using the on-board socket

The battery and charger are included in the scope of delivery, but are also available separately: Suitable battery: Part no. 42790-304

Charger: Part no. 42790-305

SKU: 42790-302
