

WATER COOLER PROTECTION GRILL

166,60€

31962-002. Onrushing air stream, the result being that anything carried by this stream finds its way into the cooler. Stones, insects and grime fill up the delicate fins of the cooler and cannot be removed without extensive labour, and usually the cooler fins bend and never look the same after. Finely meshed stainless steel grills as used by us protect the cooler, ensure that the cooling properties remain effective and are easy to clean, after cleaning the mesh will always look as good as before. The facts: Best protection and best appearance. Blocks potential damage from reaching cooler. Double protection: the large fins protect against large stones and the fine stainless steel mesh filter the smaller stones. Strong stainless steel mesh bonded to black anodised aluminium frame. Anti vibration mounting points. Strong high pressure bonding between mesh and frame. Quick and easy to install. Comes supplied with installation material. Made in Germany. Kit (left and right side).
