R 1250 GS

R 1250 GS Adventure Approx. 50 mm lower

The facts:

Function

A relaxed and active riding experience adds a definite plus to passive safety

Ergonomic 3D contour to support the natural posture of the back and comfortable leg position while riding and standing

Progressive two-layer construction with soft top layer and rigid core guarantees comfort because the seat doesn't buckle

The sitting pressure is equally distributed over a larger area, resulting in noticeably optimised weight distribution and lower specific pressure load

Distinct concave profile to relax the coccyx

More comfort with ThermoPro: With the ThermoPro coating, the temperature of this seat in direct sun at the peak of summer is up to 25°C lower compared to standard, untreated cover materials

Refined, dropped "Cut" seams

Embroidered Wunderlich logo

Made in Germany.

Techn. Information

Cover material with ThermoPro coating

Sweat-reducing, grippy cover material, combined with pin-tucks in Alcantara, dropped "Cut" seams

Taped and welded seams for 100% tightness on modern PFAFF hot air welding machines

Material of seat shell: High-strength "RoburC" shell of our own construction

Progressive, dual-layer seat core structure

-30 mm seat height for the R 1250 GS & R 1200 GS LC

-50 mm seat height for the R 1250 GS Adventure and R 1200 GS LC Adventure
