

## WUNDERLICH CRASH BAR

**309,00€**

31671-002. Permanent and unique all-round protection – the only really effective all-round protection for the F 800 GT! The facts: Perfect protection for fairing and engine block. Fairing is safely protected by the bar. In the event of a crash, the fairing protection bars prevent the bike from flipping over. Stable composite and regular distribution of forces. The connecting strut means that the forces are absorbed from all application points. Attached at six points to engine mount and frame. Elaborately crafted circular tube. Ground and cornering clearance not compromised. Detailed, easy-to-read instructions. Easy to fit. Low weight. Plastic-coated titanium steel tube. Made in Germany. Large radiuses in the crash area transmit the forces in a measured fashion to the application points and prevent jamming.
