

WUNDERLICH "CRUISE" WINDSHIELD

187,50€

35380-403. Finally, a Bagger windscreen that lives up to its name!

With our "CRUISE" windscreen, which we tailored specially for the body of the BMW K 1600 B, we've created a visually appealing Bagger windscreen that integrates perfectly into the imposing front end and the typical Bagger silhouette. The cut of the windshield now follows the line of the upper fittings and gives the powerful Bagger a coherent and harmonious character.

This windscreen lets you move your Bagger exactly how it's meant to move: With the screen fully down you can enjoy the full flow of air for cruising, while raised the screen guarantees adequate wind protection for quick trips or riding on the motorway.

Our screen is available in smoke grey and black versions, and it's our opinion that the black is ultimately the best as it also emphasises the character of the Bagger.

The facts:

Stylish Bagger windscreen that also fits all other 1600s

Significant improvement to the look

Available in a choice of smoke grey or black

Extremely resistant PMMA plastic, 5 mm thick

Harmonious flow with zero turbulences

Width 560 mm, height 440 mm

Delivery includes ABE

Easy fitting by swapping components
Adjusts like the original windscreen
