

WUNDERLICH FOOT BRAKE LEVER WIDTH EXTENSION – SILVER

41,60€

R1250GS/ GSA, Only in conjunction with 26221-003

This foot brake lever width extension works as an addition to our brake lever 26221-003. It simply screws onto our lever. Accidental slippage or failure of the lever and the associated "kicking empty air" thus becomes almost impossible and not just when used cross-country. The carefully milled fluting provides protection against slippage in the wet and unavoidable dirtying over terrain. The enlarger improves ergonomics and comfort and thus increases passive safety not only in serious off-road use.

The facts:

Function

- Increases passive safety when using the brake – and not just in the wet and over terrain
 - Improved ergonomics and comfort via significantly increases surface area
 - Greater slippage protection thanks to the milled fluting
 - Only works as an addition to our brake lever 26221-003
 - Easy mounting with supplied mounting materials

Technical info

- Aluminium, carefully milled, anodised in silver colours

Features

- Integrated Wunderlich design
 - Made in Germany
 - 5-year warranty

SKU: 26221-201
