

WUNDERLICH GARMIN ZUMO 590/595 "EXTREM" BRACKET

104,10€

21041-002. This extreme holder takes the GARMIN ZUMO 590/595 firmly under control: the lockable bracket discourages long fingers and gives a firm hold to the equipment.

The navigation is incorporated and protected by a strong metal cage. At the same time a soft inner lining protects the equipment against vibrations, damaging and pressure marks.

. The unique MultiPod bracket system connects the whole to the vehicle and provides a perfect adjusting in every direction. It's also fitted as a versatile bracket for cameras etc. Our "Extrem" bracket is made of 3 mm thick laser cut aluminium and is torsion-resistant, even by violent impacts, thanks to changeable locking cylinder of a well-known producer. Every system is delivered with two keys.

The „Extrem“ holder can be also mounted, of course, in conjunction with the standard bracket system.

The facts: High tensile and sturdy conjunction.

Theft protection of GARMIN ZUMO 590/595.

Can be used together with the MultiPod series and with the standard bracket.

3 mm thick, black anodised aluminium construction.

Changeable locking cylinder.

Inner lining to reduce vibrations and protect the casing.
