The facts:

Function

- Uniform distribution of the forces over 3 points per vehicle side
- Perfect protection of the cylinders, valve covers, both lambda sensors
 - Maximum protection combined with minimal weight
- The bar runs directly over the manifold and with the contour of the Boxer
 - No restriction of ground clearance
- Plug-n-Play fit: uncomplicated assembly including detailed fitting instructions

Technical info:

- Material: High quality steel with high tensile strength and break elongation
 - Pipe diameter: 25 mm

**Features:**

- No German type approval required
 - 5 year warranty
 - Made in Germany
- 60 days right to return

Matches:

- Micro-Flooters are optionally available (not included in delivery)

You also need the following attachment kit when assembling our valve cover protectors and BMW accessory valve cover protection (with crash guard): 35611-000.

A connecting strut between both protection bar sides can be purchased optionally (item: 26441-202).

Fits on the R1200 R LC and R 1200 RS LC without original front spoiler.

SKU: 26440-602
